## ELECTRICAL ENGINEER | QA & SOFTWARE TESTING

ingjcloaiza@gmail.com +57 312-762-9111 Manizales, Colombia LinkedIn Portfolio

## PROFESSIONAL PROFILE

Electrical Engineer with complementary training in Computer Science - Software Testing (Matrix College of Management, Technology and Healthcare Inc., Montréal, Canada). Experience in electrical project management, construction site supervision, and production process improvement. Knowledge of programming languages, SQL databases, and test automation tools. Fast learner with strong teamwork skills and a commitment to quality and efficiency in every project.

## PROFESSIONAL EXPERIENCE

### Site Resident Engineer | Conercom S.A.S.

*2023*

- Supervise and manage electrical projects in construction sites and public installations.
- Ensure electrical systems were executed in accordance with technical specifications, current regulations, and safety standards.
- Solve technical issues arising during the construction process.
- Coordinate with contractors, work crews, and other engineers to ensure compliance with project schedules.
- Track progress of electrical installations and report project status to management.
- Manage requests and control of materials and electrical supplies needed for the site.
- Prepare technical reports and project follow-up minutes.

### Production Engineer | Noatec S.A.S.

*2022 - 2023*

- Analyze, design, and modify manufacturing methods, techniques, tools, and equipment through the use of technology.
- Contribute to improving product quality and reducing manufacturing time and costs.
- Identify continuous improvement opportunities in production processes.
- Diagnose technical failures in equipment and tools, proposing corrective and preventive solutions.
- Document production processes and procedures to standardize operations.
- Collaborate with other departments (quality, R&D, sales) to optimize production flow.
- Track productivity and efficiency indicators.

### Electrical Engineering Intern | Municipality of Pereira

*2021*

- Develop electrical drawings for municipal projects using AutoCAD.
- Support the review of technical documents for public bidding processes.
- Conduct site visits to verify progress of construction processes.
- Prepare lighting studies for electrical projects using DiaLux Evo software.
- Support the engineering team in reviewing technical specifications for municipal electrical projects.

## EDUCATION

**Computer Science Technology – Software Testing ACS (LEA.CQ)**
*Matrix College of Management, Technology and Healthcare Inc. | Montréal, Canadá | 2024 – 2026*

**Electrical Engineering**
*Universidad Nacional de Colombia | Manizales, Colombia | 2016 – 2022*

**Professional Academic Exchange**
*Université de Picardie Jules Verne | Amiens, Francia | 2020*

**Certifications and Courses:**

- Python For Everybody – University of Michigan (2024)
- Web Applications For Everybody – University of Michigan (2024)
- Instalaciones Eléctricas Domiciliarias – Servicio Nacional de Aprendizaje SENA (2019)

## TECHNICAL SKILLS

- Programming languages: Python, Java, HTML, CSS, JavaScript, React
- Databases: SQL (MySQL, PostgreSQL, SQLite – joins, queries, data validation)
- Testing tools (QA/Testing): Selenium, Katalon Studio, JMeter
- Design software: AutoCAD, Fusion 360 (3D modeling), DiaLux Evo
- Office software: Excel, Word, PowerPoint
- Version control: Git
- Hardware: PC component diagnostics, troubleshooting
- Electronics: electrical circuit fundamentals, electronic components, measurement instruments and techniques

## LANGUAGES

- **English: B2**
- **French: B2 – Certified**
